Home Equity Line Of Credit

*APR = Annual Percentage Rate. After the initial 6 month introductory period the variable annual percentage rate is based on the Prime Rate as published in the Wall Street Journal ten days prior to the end of the month for the life of the line plus a margin. The margin that applies is based on the Loan-to-Value ratio, an assessment of individual creditworthiness, and our underwriting standards. If you made only the minimum monthly payment and took no other credit advances it would take 15 years 0 months to pay off a credit advance of \$10,000 at an annual percentage rate of 8.00%. During that period, you would make 180 payments of \$96.00. Certain restrictions apply. All rates and promotions are subject to change without notice.
